Dompory Health Academy — complete WhatsApp-integrated release

Contact

WhatsApp: +249 128 372 543. Email: mzamel.health@gmail.com. WhatsApp contact is already included in all 11 pages (hero, footer and floating button). No add-on or manual script insertion needed. Links open a draft; the visitor must send it. Number registration and message delivery have not been verified.

Preview

Extract the ZIP and open public/index.html. Keep files together. English/Arabic, RTL, navy/teal/gold palette. No external font dependency, tracking, payment, uploads or backend. Language preference uses browser localStorage.

GitHub upload — important

This is the full website, not only instructions. Upload the public FOLDER itself, plus firebase.json, README.md and .gitignore, into the repository root. Do not upload the ZIP alone. After committing, check that public/index.html exists. Back up the existing project before replacing files. Do not combine the previous whatsapp-contact.js add-on with this version; contact links are already integrated.

Firebase

The supplied firebase.json publishes the public directory. Use the existing Firebase CLI workflow from this folder: firebase login, firebase use --add, then firebase deploy --only hosting. An existing Firebase project and configured CLI are required. This package does not connect accounts, create a project or publish automatically.

Blogger

blogPublicUrl is blank intentionally. Supply the confirmed public HTTPS blog address in public/config.js, not a blogger.com/blog/posts owner-dashboard URL. No URL is inferred from domopry. No automatic import or sync.

Scope and integrity

11 pages include proposals, initiative incubation, nutrition, surveys and epidemiology/outbreak preparedness. Offerings are proposed, subject to capacity/scope agreement. No guaranteed grants, accredited incubator, investment fund, clinical nutrition, diagnosis, emergency response or official certificate renewal is claimed. Research support excludes fabricated data and deceptive ghostwriting. Founder profile is based on the owner-supplied CV; PhD is ongoing. Personal roles do not imply academy endorsement or partnership. Do not send patient records or identifiable survey data over chat/email. Confirm privacy and commercial terms before real orders.

Verification

Local file references and WhatsApp destinations checked across all 11 pages. No live deployment, full browser rendering test, independent credential verification or accessibility certification performed. Test mobile, keyboard access, Arabic/English, email drafts and WhatsApp on your devices before launch.

العربية

هذه حزمة الموقع الكاملة مع واتساب مدمج، وليست إضافة منفصلة. فك الضغط وافتح public/index.html. ارفع مجلد public كاملًا إلى GitHub بجانب firebase.json وREADME.md و.gitignore. لا ترفع ملف ZIP وحده ولا تضع كود واتساب في رسالة الحفظ. لا حاجة لإضافة whatsapp-contact.js الموقع المباشر لم يُعدّل السابق. أو يُنشر من هنا.
